2025-2026 ODD

Teammembers details

(Roll no -23ucs149,23ucs104,23ucs146 Name - M.ShivaniSri,G.Dharshini,M.Sathya)

Objective: The goal is to develop a web-based system that effectively manages student result	S.

This system enables administrators to add students and their corresponding marks, while students can securely access their results.

Abstract (not exceeding 300 words): This project presents a web-based Student Result Management System built using PHP and a MySQL database. It caters to two primary user groups: administrators and students. Administrators have the ability to add new students and input their marks, with the system automatically calculating total marks and grades. Students can log in to check their results. The user interface is designed to be straightforward and user-friendly, allowing schools to manage results digitally, eliminating the need for paperwork.

Requirement Analysis:

H/W requirements: A computer with at least 4GB of RAM and 500MB of storage space.

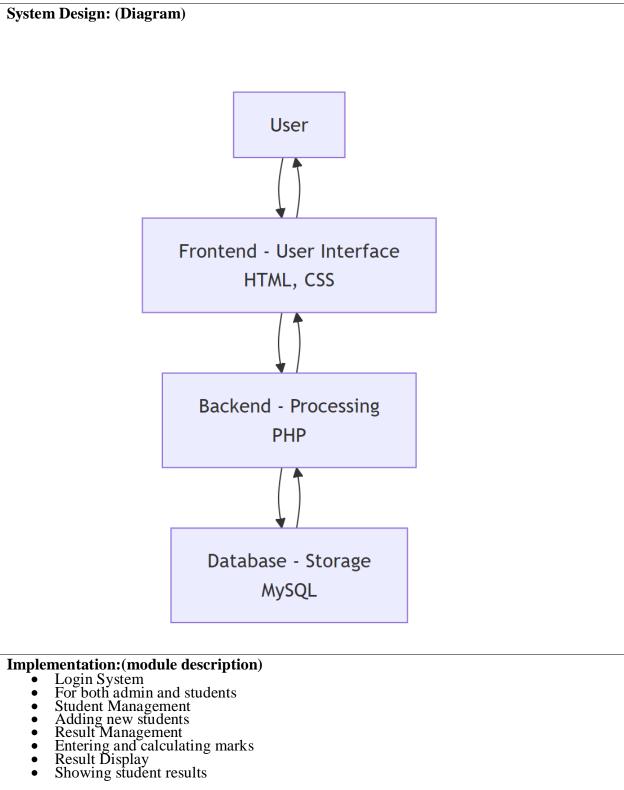

S/W requirements:XAMPP server, PHP, MySQL, and a web browser.

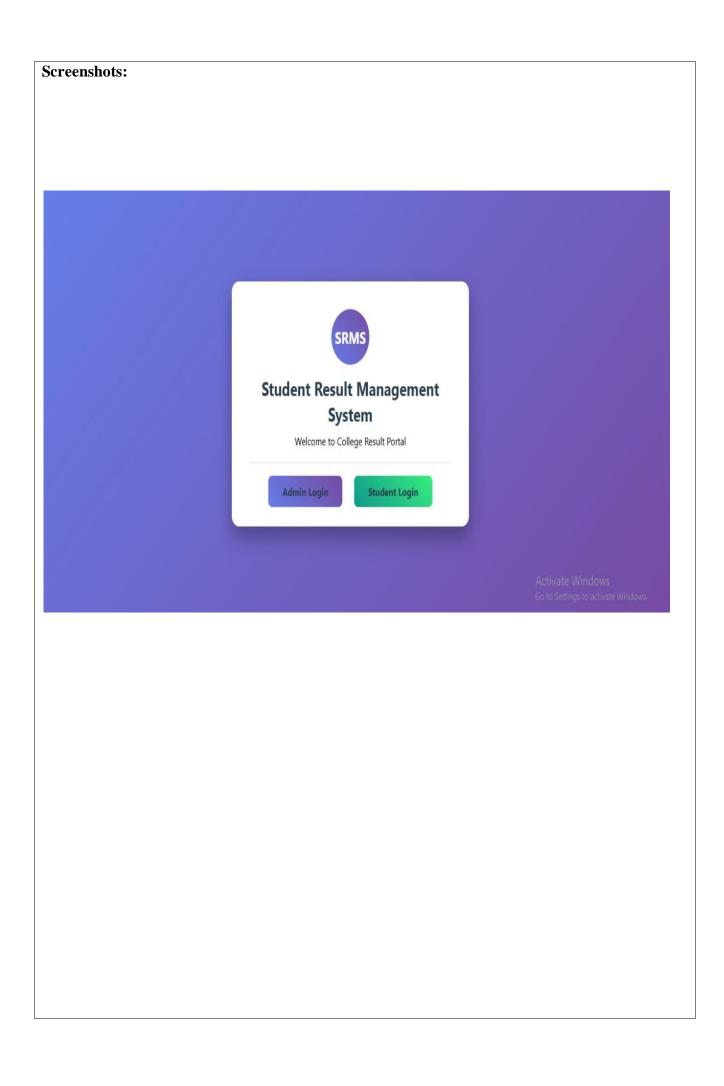

Innovation:

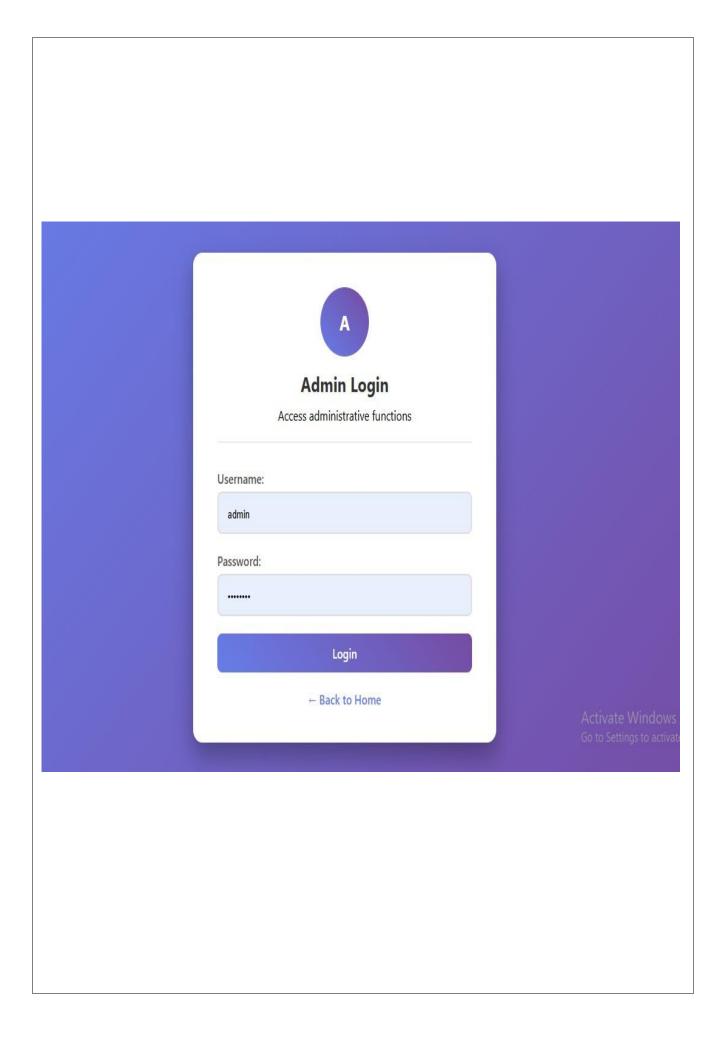

• Automatic calculation of marks

Title: Student Result Management System

- Clean and simple design
- Secure login system
- Quick result viewing
- User-friendly for both administrators and students
- •

Add New Student Register a new student in the system Register Number: Enter register number Full Name: Enter student name Department: Enter department Password: Set login password Add Student - Back to Dashboard

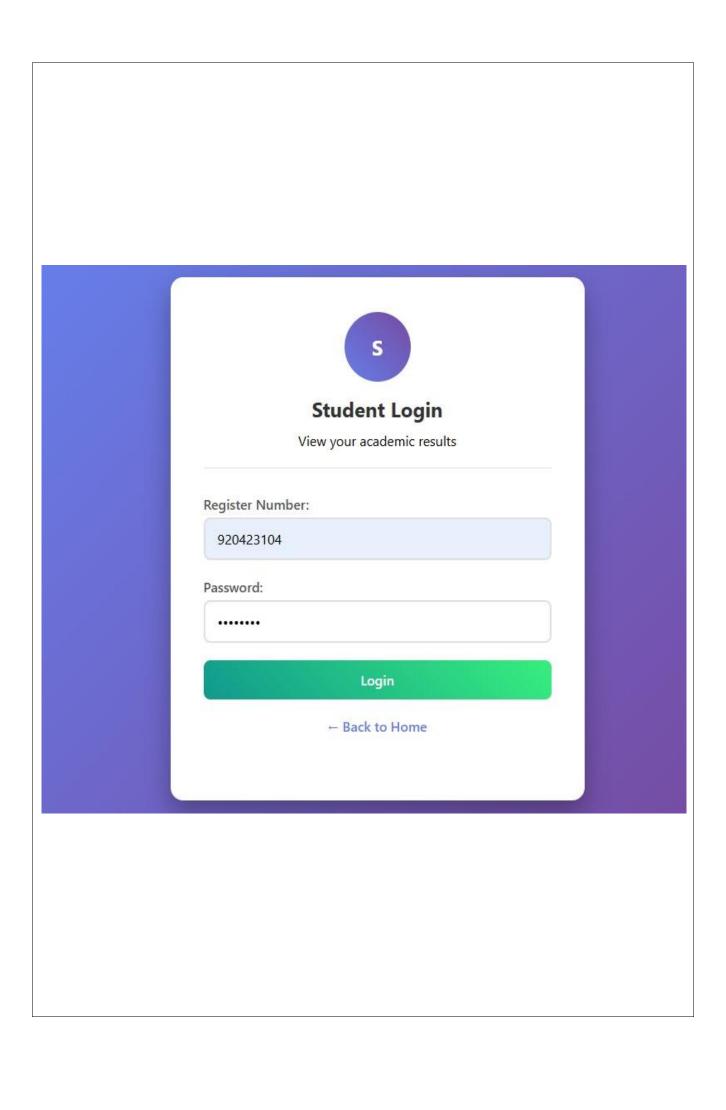

Add Student Result Enter marks for student subjects Register Number: Enter register number Subject 1 Marks: Enter marks Subject 2 Marks: Enter marks Subject 3 Marks: Enter marks Subject 4 Marks: Enter marks Subject 5 Marks: Enter marks Add Result ← Back to Dashboard

Add Student Result

Enter marks for student subjects Result Added Successfully! Total: 403 | Grade: A Register Number: Enter register number Subject 1 Marks: Enter marks Subject 2 Marks: Enter marks Subject 3 Marks: Enter marks Subject 4 Marks: Enter marks Subject 5 Marks: Enter marks

Add Result

```
Sample coding:
CREATE TABLE admin (
id INT AUTO_INCREMENT PRIMARY KEY,
username VARCHAR(50),
password VARCHAR(50)
);
INSERT INTO admin (username, password) VALUES ('admin', 'admin123');
CREATE TABLE students (
id INT AUTO_INCREMENT PRIMARY KEY,
 regno VARCHAR(50),
 name VARCHAR(100),
 dept VARCHAR(100),
password VARCHAR(50)
);
CREATE TABLE results (
id INT AUTO INCREMENT PRIMARY KEY,
 regno VARCHAR(50),
 subject1 INT,
 subject2 INT,
 subject3 INT,
 subject4 INT,
 subject5 INT,
 total INT,
 grade VARCHAR(10)
here is the 10 files code under the student_result_management folder:
1. db.php:
<?php
$conn = mysqli_connect("localhost", "root", "", "student_result_db");
if (!$conn) {
die("Database Connection Failed: ".mysqli connect error());
?>

Outcomes Achieved:

- A fully functional result management system
- Secure user login
- Automatic grade calculations
- User-friendly interface
- Successful data storage

Application Areas:

- Schools and colleges Coaching centers Training institutes Educational organizations
